X5 Retail Group CEO Lev Khasis commented:

2009 was a tough year for Russian consumers and the economy as a whole. X5's response was fast and effective. We won customers by making sure we had the right products at the most attractive prices. As a result, we met our 25% pro forma revenue growth target for 2009 and posted a 10% increase in like-for-like sales, the highest of any Russian retailer.

"Just as important, we kept our focus on X5's strategy to create durable competitive advantages and strengthen our platform for growth and productivity to capitalize on the Russian market's potential. We are building on this with continued priorities for driving customer focus, operational excellence and disciplined growth. For 2010, we expect to step up store expansion and infrastructure development with investments of up to RUR 18 billion. I am confident that X5 is in an excellent position to drive growth and efficiency this year while positioning the Company to benefit from future economic recovery."

X5 Retail Group CFO Evgeny Kornilov added:

"Our customer success, price leadership and profitability are enabled by continuous gains in efficiency. In 2009 we drove a dramatic 160 basis point improvement in X5's key performance indicator for cost control, SG&A before D&A and ESOP as a percent of sales. We believe efficiency will be even more important for sustaining leadership and shareholder returns as the market develops, and in 2009 we launched our Strategic Efficiency Program to take X5's operational excellence to the next level.

"The crisis conditions of 2009 were a successful test of X5's financial strength. X5 generated a record USD 734 mln in operating cash flow thanks to strong operational performance and efficient working capital management. This, helped by prudent liquidity management and improved efficiency of investments, enabled net debt reduction by USD 250 mln year-on-year. We also secured resources to refinance the Company's USD 1.1 bln syndicated loan due in December 2010 with the view to improve our debt maturity profile and minimize currency exposure. We continue to prioritize investments that offer the best returns, while increasing cash flows and strengthening our balance sheet to ensure flexibility in defining strategic goals and supporting growth in the years to come."

Effect of RUR/USD Exchange Rate Movements on Presentation of X5's Results and Their Dynamics

X5's operational currency is the Russian Ruble (RUR), while the Company's presentation currency is the U.S. Dollar (USD). As RUR/USD rate has substantially changed in the past twelve months, comparisons of the Company's financial results either with the corresponding period a year ago (for profit & loss statement) or with the beginning of the year (for balance sheet statement) have been substantially affected by these movements. For more details please see page 8 of this press-release.

⁽¹⁾ Please note that in this and other tables of this press release immaterial deviations in calculation of % change, subtotals and totals are explained by rounding.

⁽²⁾ Profit & Loss figures for 2008 in this press release are presented on pro-forma basis, unless otherwise stated. Pro-forma figures include results of the acquired Karusel hypermarket chain from 1 January 2008. We believe pro-forma numbers are useful because they allow investors to evaluate X5's operating results and financial performance for different periods on a more comparable basis. These figures should be used in addition to, but not as a substitute for, the Consolidated Financial Statements, which include Karusel's results only as from 30 June 2008, when the acquisition was completed. Please note that acquired Paterson stores' results are included only for December 2009.

⁽³⁾ CIP stands for Construction in Progress. Please see section *Impairment of CIP & Fixed Assets* for additional information on 2009 impairment.

Net Sales & Gross Margin Performance

For 2009 X5 reported net sales of USD 8,717 mln - a year-on-year decline of 2% in USD terms and 25% growth in RUR terms on pro-forma basis driven by industry-beating like-for-like (LFL)⁽¹⁾ sales growth of 10% and strong continued expansion.

In 2009 we clearly benefited from our multi-format strategy and the phenomenal customer appeal of discounters. Pyaterochka had the highest customer traffic growth of any retailer in Russia as consumers responded enthusiastically to our brand promise of *lowest price in the market on 100% of assortment*. In hypermarkets, we re-launched Karusel following integration of this acquisition, educating Russian consumers on the attractions of hypermarkets through our "Everything under One Roof – at Low Prices" publicity campaigns and promotions. Supermarkets faced the biggest challenge from trading down trends by consumers, especially in regions outside of Moscow and St. Petersburg. Our goal was to maintain loyalty among middle to upper income consumers in areas with favorable demographics for supermarkets.

X5 drove the highest like-for-like sales and customer traffic of any Russian retailer in 2009, with a record of nearly 1 billion store visits, thanks to our "Close to the Customer" policy of reinvesting gross margin in stores' value propositions. As a result, X5's gross margin for the year totaled 24.2% compared to 25.6% in 2008 - a year-on-year margin investment of 140 bp in line with management's expectations.

⁽¹⁾ Like-for-like (LFL) comparisons of retail sales between two periods are comparisons of retail sales in local currency (including VAT) generated by the relevant stores. The stores that are included in LFL comparisons are those that have operated for at least twelve full months preceding the beginning of the last month of the reporting period. Their sales are included in LFL calculation starting from the first day of the month following the month of the store opening.

Full year 2009 SG&A expenses decreased as a percentage of revenue by 60 bp year-on-year to 20.0%. Before depreciation, amortization and one-off non-cash impairment charge, SG&A expenses accounted for 16.9% of sales - a year-on-year decrease of nearly 90 bp. Net of ESOP cost, this indicator declined by 160 bp year-on-year. SG&A decline as a percentage of sales was achieved through cost control initiatives and implementation of X5's Strategic Efficiency Programme. Significant savings were obtained from administrative expense and staff cost optimization, renegotiation of leases and energy saving initiatives.

As at 31 December 2009 the Company employed 68,457 people compared to 60,467 as at 31 December 2008. The increase is primarily due to new store additions in 2009, when X5 added a net 271 new stores. Nevertheless, headcount growth of 13% was noticeably below the 22% increase in selling space for the year as X5 began to implement its store labour productivity improvement project. Achieved staff cost savings this year were partially offset by ESOP cost of USD 59 million for 2009 (compared to USD 2.5 million gain reported in 2008). ESOP charge is attributable to X5 GDR price appreciation of over 270% in 2009.

Impairment of CIP & Fixed Assets

Based on a regular impairment test of land, buildings and construction in progress ("CIP") performed by X5 at the end of 2009, the Company has taken an impairment charge of USD 48 million with respect to certain real estate assets and construction projects suspended due to the financial crisis or otherwise affected by economic deterioration. This impairment charge is recorded on the profit & loss statement for 2009 along with depreciation & amortization, with a corresponding decrease in property, plant and equipment on the balance sheet. This impairment charge is a non-cash one-off item that does not impact the strategic value of X5's assets or business and is not indicative of the Company's overall ability to generate cash flow.

Non-Operating Gains and Losses

Finance Costs

Full year 2009 net finance costs decreased 6% year-on-year in USD terms and increased 20% in RUR terms due to higher interest rates on RUR funding, which were especially noticeable at the beginning of 2009 and moderated throughout the year. The effective interest rate on X5's debt for the full year 2009 was approximately 8.0%.

Foreign Exchange (FX) Gain/(Loss)

The Company posted a USD 46 million FX loss for full year 2009 due to exchange rate volatility throughout 2009. This is a primarily non-cash item, resulting from revaluation of the Company's USD-denominated debt.

Income Tax

For 2009, X5 reported income tax expense in the amount of USD 99 mln. Effective tax rate for the year totaled 37%, which is higher than the statutory tax rate for three main reasons: inventory shrinkage is not tax deductable in Russia, ESOP cost is not tax deductable in Russia and FX loss is only partially tax deductable.

Net Increase in Cash & Cash Equivalents	134.9	52.6	156%	134.8	97.3	39%

Full year 2009 net cash flow from operating activities totaled USD 734 million compared to USD 629 million a year ago. Higher cash generation was driven by strong operating performance and efficient working capital management.

Net cash used in investing activities decreased dramatically to USD 434 million in 2009 from USD 1,656 million in 2008. Organic capital expenditures ("CapEx") totaled USD 245 million in 2009 versus USD 997 million in 2008, while in 2009 X5 added 126 thousand sq.m. of selling space organically compared to 127 thousand sq.m. in 2008. CapEx savings were attributable to more favourable real estate conditions and a shift in focus to leased versus owned premises (over 70% of selling space added and new stores opened in 2009 were leased), as well as a decrease in construction and repair costs. Increased CapEx efficiency provided flexibility for consolidation opportunities: X5 acquired Paterson for USD 189.5 million (equity value), adding 82 stores with total net selling space of approximately 63 thousand sq.m. on attractive, value enhancing terms while remaining within our 2009 CapEx limit and financing this acquisition from operating cash flow.

Net cash used in financing activities in 2009 amounted to USD 194 million, as the Company utilized generated free cash flow to reduce its debt levels, including redemption of acquired Paterson debt in the amount of approximately USD 90 million (gross debt).

Liquidity Update

Prudent financial management and deleveraging efforts have significantly strengthened the Company's balance sheet and liquidity. As at 31 December 2009, total debt amounted to USD 1,944 million. Net debt totaled USD 1,532 million - a year-on-year reduction of USD 250 million or 14%. Net debt to EBITDA ratio decreased from 2.22 times as at 31 December 2008 to 2.08 times at year-end 2009.

X5's short-term debt increased from USD 578 million as at 31 December 2008 to USD 1,657 million at the end of 2009, due to reclassification of certain obligations from long-term to short-term debt. These obligations potentially come due within twelve months and include RUR 9 billion in corporate bonds with a put option exercisable in July 2010, and the USD 1.1 billion syndicated loan maturing in December 2010. Importantly, X5 has already secured a 5-year ruble-denominated credit line equivalent of up to USD 1.1 billion from Sberbank for the purpose of refinancing the loan. This fully-committed long-term credit line is the first large-size "forward-start" facility in the Russian market. It can be utilised in several tranches with varying maturities. This arrangement provides X5 with great flexibility for managing the Company's liquidity position, minimising currency exposure and improving our debt maturity profile.

Net of the aforementioned arrangement with Sberbank, as at 31 December 2009, the Company had access to RUR-denominated credit facilities of approximately RUR 25 billion (approximately USD 812 million). Of this amount, approximately RUR 17 billion (approximately USD 555 million) represented available undrawn credit lines with major Russian and international banks.

Effect of RUR/USD Exchange Rate Movements on Presentation of X5's Results and Their Dynamics

X5's operational currency is the Russian Ruble (RUR), while the Company's presentation currency is the U.S. Dollar (USD). As RUR/USD rate has substantially changed in the past twelve months, comparisons of the Company's financial results either with the corresponding period a year ago (for profit & loss statement) or with the beginning of the year (for balance sheet statement) have been substantially affected by these movements:

- Comparisons of profit & loss figures with respective periods last year reflect a negative translational effect from RUR/USD rate movements, resulting in a difference between year-onyear change in RUR and the respective change in USD of approximately 12% for Q4 and 27% for full year 2009. For reference, to translate its profit & loss figures from RUR to USD for reporting purposes, the Company applied RUR/USD rate of 24.86 for full year 2008 (average for the period) and RUR/USD rate of 31.72 for full year 2009 (average for the period). Reported USD-denominated profit & loss figures for Q4 2009 and 2008 represent difference between reported full year and nine months figures for respective years.
- Comparisons of balance sheet figures as at 31 December 2009 to balance sheet figures as at 31 December 2008 reflect a negative translational effect from RUR/USD rate movement, resulting in a difference between change in RUR and the respective change in USD of approximately 3%. For reference, to translate its balance sheet figures from RUR to USD for reporting purposes, the Company applied RUR/USD rate of 29.38 as at 31 December 2008 and RUR/USD rate of 30.24 as at 31 December 2009.
